

## OPERATIONAL SERVICES

### **4:150 Facility Management and Building Programs**

The Superintendent or designee shall manage the District's facilities and grounds as well as facility construction and building programs in accordance with the law, the standards set forth in this policy, and other applicable School Board policies. The Superintendent or designee shall facilitate: (1) inspections of schools by the Regional Superintendent and State Fire Marshal or designee, (2) review of plans and specifications for future construction or alterations of a school if requested by the relevant municipality, county (if applicable), or fire protection district, and (3) compliance with the 10-year safety survey process required by the School Code.

#### Standards for Managing Buildings and Grounds

All District buildings and grounds shall be adequately maintained in order to provide an appropriate, safe, and energy efficient physical environment for learning and teaching. The Superintendent or designee shall provide the Board with periodic reports on maintenance data and projected maintenance needs that include cost analysis. Vacant school distinct buildings that are the sole property of the district, and have not been repurposed for future use, will be demolished within 3 years of its vacancy. Prior Board approval is needed for all renovations, demolition, or permanent alterations to buildings or grounds when the total cost will exceed \$25,000, including the cost equivalent of staff time. This policy is not intended to discourage efforts to improve the appearance of buildings or grounds that are consistent with the designated use of those buildings and grounds.

#### Standards for Green Cleaning

For each District school with 50 or more students, the Superintendent or designee shall establish and supervise a green cleaning program that complies with the guidelines established by the Illinois Green Government Coordinating Council.

#### Standards for Facility Construction and Building Programs

As appropriate, the Board will authorize a comprehensive study to determine the need for facility construction and expansion. On an annual basis, the Superintendent or designee shall provide the Board with projected facility needs, enrollment trends, and other data impacting facility use. Board approval is needed for all new facility construction and expansion.

When making decisions pertaining to design and construction of school facilities, the Board will confer with members of the staff and community, the Illinois State Board of Education, and educational and architectural consultants, as it deems appropriate. The Board's facility goals are to:

1. Design buildings for sufficient flexibility to permit new or modified programs which drive student achievement and accommodate restorative practices.
2. With input from teachers and building staff, base educational specifications for school buildings on identifiable student needs.
3. Meet or exceed all safety requirements and requirements on the accessibility of school facilities to disabled persons as specified in state and federal law.
4. Provide for low maintenance costs, energy efficiency and minimal environmental impact.
5. Develop and implement a communication plan that tells the story to the community about the intention of design, respects the input of stakeholders and their ownership in the process.
6. Meet requirements on the accessibility of school facilities to disabled persons as specified in State and federal law.

7. Provide for low maintenance costs, energy efficiency, and minimal environmental impact.

### Naming Buildings and Facilities

Recognizing that the name for a school building, facility, or ground or field reflects on its public image, the Board's primary consideration will be to select a name that enhances the credibility and stature of the school or facility. Any request to name or rename an existing facility should be submitted to the Board. When a facility is to be named or renamed, the Board President will appoint a special committee to consider nominations and make a recommendation, along with supporting rationale, to the Board. The Board will make the final selection.
